The Pantiern Cunningham Affair.

Before Judge Russell.

Maken 26.—The People on Deniel Countriphons.—Judge Russell gave the following decision to-day:—

This is an application to admit the defendant to ball in the above case, on the supposition that it is ballable in its character. I have examined the inding of the Coroner's inquest, and have concluded from the testimony that it is acase of either murder or justifiable homiside. The evidence is of such a character as to previous the decidant from being admitted to bail, for ball is only allowed to application where it stands indifferent whether the party is guilty or innocent of the accusation against him. The application must therefore be desied, and the defendant remanded.

News from the Dominican Republic.

We have received a copy of the Official Gazette of March 7, published at Santiago de los Caballeros, St. Do-minge According to the intelligence contained in this paper, it appears that the mulatto government, headed by Baes, the ex-President, has fallen, and that the party of the Santana, or Spanish faction, has succeeded in ob-

taining possession of power.

R appears that Don Jose Valverde, one of the leaders of the latter party, has been elected President of the repub ilc. The Gasette contains several decrees signed by him nominating the members of his Cabinet and the several officers of his government, all which is done by decree

The same journal gives a glowing account of the ceremony of the installation of the President, on which occasion a Te Deum was performed with great splendor; there was also a public breakfast and a gread bail on the occasion at the city of Mora. splendid display of fireworks, balls, dinners, promenades, &c., &c.

The ceremony of the swearing in of the new President and of the Vice President is described with the most minute detail. It appears, indeed, to have been a very imposing spectacle. The eath was administered by the Speaker of House of Representatives, whose speech on the occasion together with the roply of the President, are given in full. They contain merely the ordinary commonpiace of such affairs. The editor comments with delight upon the fact that the Speaker in his address to the President, omitted his title of General, and simply called him citizan Valverde, as also the fact that General Valverde appeared in plain citizen's clothes.

The toast offered by the new President is highly significative of the nature of the government and of the principles of its conduct. It was as follows:—

To the union of the high powers of the State and of the church, without which union happiness and prosperity are impossible.

A toast given by one General Mitchell is of historical importance, as showing that Barz still holds power in one part of the country and that the war between the two pardes is still carrying on. It was as follows:—

To the health and liberty of the political prisoners who are plaing in the dungeons of St. Domingo. plaing in the duageons of St. Domingo.

The breakfast was concluded at 4 o'clock P. M., whereupon the newly created President, with the clergy, the officers of the army, the Mayor and civil authorities, formed a procession, which marched through all the principal streets of the city. The day terminated with fireworks, illuminations and a grand ball.

The Utah Expedition. INTERESTING LETTER FROM GEN. JOHNSTON. HRADQUARTERS DEPARTMENT OF UTAH, 1 CAMP SCOTT, Jan. 20, 1858.

Major-I have nothing material to report since my las communication. Accompanying that I sent a file of the Descrit News, containing the message of Brigham Young to the Legislature of Utah. You have in that message and the resolutions of the Legislature their disloyalty to the Union heretofore made against this people. My informa-tion respecting their conduct since is that their troops are organized to resist the establishment of a Territorial government by the United States, and in furtherance of that object, they have erected works of defence in the mountain passes and near Salt Lake city. Knowing how repugnant it would be to the policy or interest of the government to do any act that would force these people into unpleasant relations with the federal government. ing General, on all proper occasions have manifested in my intercourse with them a spirit of conciliation, but I do not believe that such consideration for them would be properly appreciated now, or rather would be wrongly interpreted; and in view of the treasonable temper and feeling now pervading the leaders and greater portion of the bornons, I think that neither the honor nor dignity of the government will allow of the slightest concession being made to them.

government will allow of the regumes made to them.

They should be made to submit to the constitutional and legal demands of the government unconditionally—an adjustment of existing difficulties on any other basis would

adjustment of existing difficulties on any other basis would be nugatory.

Their threat to oppose the march of the troops in the spring will not have the slightest influence in delaying it; and if they desire to join issue, I believe it is for the interest of the government that they should have the op-

interest of the government that they should have the opportunity.

On the night of the lith of this month I sent an express to Santa Fe, to acquaint General Garland with the design of the Mormons to intercept the caballada it is expected Capt. Marcy will bring on from New Mexico, and to ask additional force to his easont. I will also take other measures to theart them. I sond herewith a letter of Liout. Burns' on the subject of a transportation corps. As a question of the highest interest to the government, in respect to the mobility of our troops and eccapomy of administration of the business of the quartermaster's lopariment, it eminently commends itself to the attention of the General in Chief. It is of great importance that such a corps, properly organized, should be created, and it is with the view of saking the consideration of the subject by the Commanding General that I forward the letter of Lieutenant Burns, who has much experience as Assistant Quartermaster.

To make effective the field battery in obarge of Captain Reno, and to retain in service at this time a number of soldiers whose period of services about to expire, I have authorized him to enlist as many of them as will enable him to work the guns. If this act is approved by the Commanding General, I request that he will ask for it the sanction of the Secretary of War, who, under the authority of the law of the 18th June, 1846, can fix the number of the Ordnance corps. The winter is not so cold as was anticipated from the severity of the beginning, and the health fulness of the climate at this season is unsurpassed; there are but very few soldiers sick from climatic causes. The wrather is notince so cold nor stormy as often to prevent the daily instruction of the troops of the different arms of service.

with great respect, your obedient servant,
A. S. JOHNSTON, Colonel 2d Cavalry, commanding.

The New York city proportion of the expenses of the four months is \$319,243 71. At this rate the expense of the Folice Department would be about \$160,000 per assum greater than the cost under the old regime. This estimate does not include the expenses of the Commissioners salaries, the amount of which seems to be carefully concealed. The nominal salary is \$3 per working day. The Consejo of Ministers were advised of it, and immediately arrosted all the parties and sent them to prison, excepting Sr. Urets, who is banished for his pains.

The murderers escaped.

BOLIVIA.

The only remarkable event of which we are advised from that republic is, the mutiny of the garrison of the port of Cablis, whose object was to rob the public treatury in that town. This they carried into effect and started for Feru, without being headed by anybody, and committing some crimes along the road, amongst them the nurder of two Englishmen of the mame of Jose, according to the vulgar language. The chiefs of the force let for the the inhabitants in pursuit of the mutineers, and, overtaking them, took twenty-one prisoners and shot the assassing, the others continuing their route to Peru. It is to be hoped that those who reach that territory will not be harbored by the authorities of the country.

Tranquility reigns throughout the rest of the republic, although the threst of Belzu's return, in order to overthrow Linares, is still held out.

OF THE GOVERNMENT—THE TORACCO MONOPOLY—MONETARY INSTITUTIONS—THE HARVEST—DHATH
OF A PATRIOT—MARKETS.
The Vaiparise Mercurio of 18th of February contains the following news summary:—
The principal government has been of little importance, the administrative movement has been of little importance. The President is still in this port, with the Minister of Justice. The Minister of War continues his tour of the Southern provinces, and only the Ministers of the Interior and Finance are in the capital. The last is busy with a project for medifying the law which organizes our mouetary system; and, although we are not acquainted with the terms of his project, it is said that it adopts in a great measure the modifications argued by the independent press. It is also said that he will present to the next Congress a project suppressing the tobacco monopoly.

The Vaiparais Deposit and Discours Eark has presented the general meeting of shareholders as account of the operations realized during the second half year of its existence; it appears therein that this establishment progresses in the most flattering manner.

The Mortgage Can office, also a new institution among us, has bad, during the first two years of its existence, a movement which shows the importance it may have in the prosperity of the country, if its charter be strictly and impartially fuffilled. During this period, it has emitted bill of credit to the amount of \$3,023,400, of which \$78,600 have been redeemed at a par, and \$2,949,300 remain in circulation.

The future of Families, or Life Insurance society, which also reckons two years of existence, has obtained a still more satisfactory and amazing success. In January last it aiready possessed a subscribed capital of \$5,560,000.

But, notwithelanding the importance of the affairs, what at present absorbs public attention, and will continue to be the universal there ustill the end of March next, is the election of Representatives, Senators, and municipal members.

Our political agitation has not hindered agriculturists from devoting themselves to the important tank of gathering the abundant harvests with whon nature has rewarded their efforts; the results obtained in all the branches of agriculture have exceeded every calculation, and promise our national industry, rather cast down by the crisis and high price of food, a year of extraordinary abundance. Mining industry, which at present suffers from the fall in the price of copper, will be much benefitted, as on the account the cost of working the mines will be much diminished.

Ine republic has had to regret during this fortnight the less of one of her adopted sons, who, on several occasions, had rendered her important services. Such was Den Vetorino Garrido, a Spanjard by birth, coloned in the Chilean service, representative of Chile in Peru up to the year 1853, superintendent in the mint, and substitute in the Senate.

The 12th of February, the anniversary of the battle of Chuchaco, in which the country's independence was ensured, has been calcivated by the press with unanimous applicance; and on this cocasion has been brought to light the project conceived by the indefatigable friend of our national glory, General O'Brien, of erecting a column on the battle field, for which Don Bernardo Solar, the present owner of the ground, has offered the Series of solumn on the battle field, for which Don Bernardo Solar, the present owner of the
